

SERVICE BULLETIN 79

SUBJECT: NOSE GEAR EMERGENCY EXTENSION GAS SPRING

APPLICATION: ALL GLASAIR I AND II RG KITS (SHIPPED PRIOR TO 04/01/90) THAT HAVE BEEN SHIPPED WITH 60 LB. EMERGENCY NOSE GEAR EXTENSION GAS SPRING

DISCUSSION: We have had several builders report that the 60 lb. nose gear emergency extension gas spring (supplied with the kit) was not powerful enough to extend the nose gear in flight. After testing several different style and pressure gas springs we have settled on supplying a 110 lb. gas spring as replacement. Retrofitting to this new gas spring will require some minor changes to the installation hardware due to its different style ends. The 110 lb. gas spring installation kit will include the gas spring, installation hardware, and installation instructions for the gas spring retrofit.

To order the new 110 lb. gas spring call our Customer Service Department and order the (771-0003-510) 110 lb. Nose Gear Emergency Extension Gas Spring Kit, cost \$35.00.
