

SERVICE LETTER 5

SUBJECT: Glasair Gross Weight

DISCUSSION: Due to past gross weight increases for various model Glasairs over the last few years, and the need to communicate this data to our customers, the following table was made listing the approved gross weights for each model and its category or wing configuration.

Please add this information (if not correctly listed) to your owners manual, if you are having your aircraft approved by your aviation authority at a higher gross weight shown in this table.

MODEL	Normal (23 ft. wing span)	Normal (27 ft. wing span)	Aerobatic (23 ft. wing span)
G-I TD (early gear struts)	1600 lb.	1700 lb.	1600 lb.
G-I TD (with later 3/8" thicker gear struts)	1900 lb.	2000 lb.	1800 lb.
G-II TD (with later 3/8" thicker gear struts)	1900 lb.	2000 lb.	1800 lb.
G-I FT and G-II FT	2000 lb.	2100 lb.	1800 lb.
G-I RG and G-II RG	2000 lb.	2100 lb.	1800 lb.
G-II-S TD & Super II-S TD	2000 lb.	2100 lb.	1900 lb.
G-II-S FT & Super II-S FT	2100 lb.	2200 lb.	1900 lb.
G-II-S RG & Super II-S RG	2100 lb.	2200 lb.	1900 lb.
G-III	2400 lb.	2500 lb.	2120 lb.
