

## Service Bulletin 57, (A)

**Subject:** Aileron Crossover Cable Lengths

**Applicability:** All Sportsman Kits

**Issue:** Revised Cable Lengths

**Reference:** Assembly Manual Systems Installation, Section IX,  
Pages 154 – 165 and Advanced Notice of Revision dated  
10/21/2005

**Compliance Time:** Prior to first flight

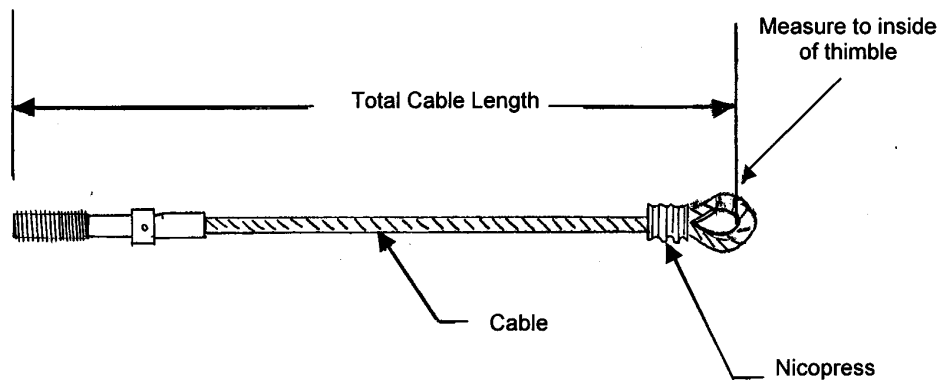

### **Discussion and Background Information:**

Further refinements in determining the most optimum pre-assembled cable lengths have prompted this revision to Service Bulletin 57. Also included are photos of a simple fixture to aid in establishing accurate cable lengths.

Note: The shackle shown in the figure in Service Bulletin 57 has been eliminated in simplifying the procedure of measuring and fabricating the cable ends. It has not been eliminated in the cable installation!

Part Number	Cable Position	Total Length	Revised Length
618-01014-01	LH Aileron Crossover Cable	<del>140 1/4"</del>	139 3/4"
618-01015-01	RH Aileron Crossover Cable	<del>155 13/16"</del>	155 3/8"
618-01013-01	LH Aileron Secondary Cable	<del>176 3/4"</del>	175 1/2"
618-01013-01	RH Aileron Secondary Cable	<del>176 1/8"</del>	175 3/4"
