

GLASTAR SERVICE LETTER 1

Subject: Options Development

Applicability: All GlaStar kits

Discussion: As you progress through the construction of your GlaStar, you will encounter in the *Assembly Manual* mention of many Stoddard-Hamilton Option Kits for equipping and customizing your aircraft. Please be aware that not all the options named in the *Manual* are available yet, although we are actively pursuing their development. If you reach a stage of construction where the *Manual* suggests an option should be installed, and the option is not listed in our current *Option Catalog*, please call our Order Desk to inquire about current availability. If an option is unavailable, and you feel it cannot be installed at a later point in the construction process, our Builder Support personnel may be able to advise you on how best to continue work on your GlaStar without "painting yourself into a corner" for later installation of the option.

We greatly appreciate your patience as we work hard on the ongoing process of options development. Please let us know if there's anything we can do in the meantime to help your project progress more smoothly.
